SUMMARY

Software Engineering undergraduate with hands-on experience in full-stack development, specializing in frontend development using React and Next.js. Experienced in backend development with Node.js, Express, Spring Boot, and multi-database integration (MySQL, MongoDB, PostgreSQL, SQLite). Skilled in UI/UX design using Figma, building multi-tenant systems, microservices-based scalable architectures, and modern deployment workflows with Docker. Experienced in startup environments, collaborating in agile workflows, and delivering end-to-end solutions.

Languages: HTML, CSS, JavaScript, Java, Go

Frontend Frameworks & Libraries: React, Next.js, Tailwind CSS

Backend Frameworks & Tools: Node.js, Express.js, Spring Boot

Databases: MySQL, MongoDB, PostgreSQL, SQLite

Tools & Technologies: GitHub, Bitbucket, Figma, Postman, Docker, Redis, Junit, Mockito

WORK EXPERIENCE

Full-Stack Developer – ClockworksCode (Startup)

Feb 2026 - present

Project: GeneralHR – Multi-tenant HR Management System

- Developed the frontend using Next.js, implementing responsive and user-friendly interfaces.
- Designed UI/UX in Figma and translated designs into functional frontend components.
- Implemented frontend-backend integrations, working across Node.js and Spring Boot modules.
- Built and maintained microservices for inter-service communication in a scalable architecture.
- Worked with Docker for containerization and deployment of services.
- Implemented report generation for HR metrics including attendance, leave, and payroll summaries.
- Built role-based access control (RBAC) for Super Admin, Admin, and Employees.
- Added real-time notifications for leave approvals, announcements, and task reminders.
- Developed analytics dashboards with visual charts and metrics for HR managers.
- Implemented document management system for secure storage of employee documents.
- Integrated external APIs for email notifications, payroll, and calendar sync.
- Added audit logging for tracking system activity and changes securely.
- Integrating Redis into the service to enhance caching.

Project: Tiered S3 File Storage API (Prototype)

- Built a full-stack cloud-based file storage system with tiered limits for clients.
- Implemented API key authentication and PostgreSQL database with client, tier, and file tables.
- Integrated AWS S3 with pre-signed URLs for secure file upload and download.
- Designed REST APIs for file upload, listing, download, and deletion.
- Built monitoring and usage tracking for clients to manage storage efficiently.

Sri Lanka Telecom (SLT) – Software Engineer Intern

Sept 2025 - Feb 2026

- Assisted in frontend and backend development, integrating APIs and databases.
- Implemented responsive UIs and worked on database integration with MySQL/PostgreSQL.
- Collaborated in an agile team workflow, following best practices and version control.

Campus Project

CinnamonSri – Smart Solution for Ceylon Cinnamon Industry

- Developed an IoT-enabled drying system with DHT22 sensors and ESP8266, sending real-time alerts via mobile app.
- Built AI models for cinnamon quality and price prediction.
- Implemented image-based grading and PDF report generation.
- Created a disease detection module using CNNs with voice alerts and a central monitoring dashboard.

Online Laundry Management System – EcoWashR

- Developed an online laundry service system with admin and customer portals.
- Technologies: React, Node.js, Express.js, MySQL, Tailwind CSS

EDUCATION

Sri Lanka Institute of Information Technology

Malabe, Sri Lanka

BSc (Hons) in Information Technology (Undergraduate)

2022 – Present
